

A good dietary supplement

# ARTHROBASE PLUS®

## Supports JOINT FUNCTION & Preserves JOINT STRUCTURE

Glucosamine and chondroitin sulfate are part of the glycosaminoglycans present in the mesodermal structures: connective tissue, bone, cartilage and the surrounding matrix. Formulated without preservatives, artificial flavours or colours, **ARTHROBASE PLUS®** is manufactured according to Good Manufacturing Practice guidelines (GMPs). Heel always provides premium quality products and excellent service.

### Arthritis & Arthrosis Protocol

#### Weeks 1 and 2

- **Traumeel tablets:** 1 tablet 3-5 times a day
- **Zeel tablets:** 1 tablet 3-5 times a day
- **Traumeel ointment:** Apply locally 2-5 times a day
- **ARTHROBASE PLUS®:** See recommended dosage corresponding to stage of evolution

#### Weeks 3-4-5

- **Zeel ointment:** Apply locally 3-5 times a day
- **Zeel tablets:** 1 tablet 3-5 times a day
- **ARTHROBASE PLUS®:** See recommended dosage corresponding to stage of evolution

### Complaints of the patient (related to the evolution of the arthrosis)

- **Stage I:** The patient has some problems especially during a charged movement (e.g. a long walk with a shoulder bag).
- **Stage II:** The mobility of the joint decreases because of the pain at the beginning of the movement.
- **Stage III:** The mobility of the joint decreases significantly. There are a lot of secondary inflammations, especially after a period of overcharge.
- **Stage IV:** The joint is stiff, immobile. One can observe muscular compensation. The joint becomes malformed, which can influence the position of the limbs.

### Recommended dosage of ARTHROBASE PLUS® (arthrosis)

- **Stage I:** 2 tablets of ARTHROBASE PLUS® per day
- **Stage II:** 3 tablets of ARTHROBASE PLUS® per day
- **Stage III:** 4 tablets of ARTHROBASE PLUS® per day
- **Stage IV:** 4 tablets of ARTHROBASE PLUS® per day

**ARTHROBASE PLUS®** is an established dietary supplement of glucosamine and chondroitin sulfate which supports joint function and preserves joint structure.

The naturally occurring compound glucosamine is an initial substance vital for the body's synthesis of connective tissue. Chondroitin sulfate is an advanced building block which the body can directly incorporate, without prior modification.

A sufficient supply of glucosamine and chondroitin sulfate is required for the production and for continuous renewal of connective tissue important for joint cartilage, bones and the surrounding matrix.

#### Ingredients:

Glucosamine Sulfate (Potassium Chloride), Chondroitin Sulfate, Microcrystalline Cellulose, Acacia, Magnesium Stearate, Silicon Dioxide and Spearmint Oil. No artificial flavours, colours or preservatives. No lactose, sugar, starch, wheat or yeast.

#### Suggested use:

Adults: Take one tablet three times daily as a food supplement or as directed by a health professional.

#### Caution:

Keep out of the reach of children. Store in a cool, dry place.

Each tablets contains:

Glucosamine Sulfate (Potassium chloride) 500 mg  
& Chondroitin Sulfate 400 mg

60 tablets
